1.2 SVM Sambhal

PCM with Computer Science

Graduated: 2022 | Sambhal, India

Socials

Gitub: kartikey2004-git

LinkedIn: kartikey-bhatnagar

Portfolio: kartikey-eosin.vercel.app

Coursework

3.1 Core Subjects

Electronic Devices & Circuits
Digital Electronics
Signals and Systems
Network Analysis and Synthesis

Skills

4.1 Programming

- JavaScript
- TypeScript
- C++
- Python

4.2 Familiar

- SQL
- PostgreSQL
- MongoDB

4.3 Tech Stack

- React
- Next.js
- Tailwind CSS
- Node.js
- Express
- MongoDB
- Prisma
- Firebase
- Supabase
- NeonDB

4.4 Tools

- Git
- Render
- Postman
- Vercel

Projects

- **AI Resume Analyzer:** Browser-based tool for AI-powered resume feedback using Puter.js
 - Uses Claude Sonnet-3.7 to analyze resumes and give job-specific, ATS-friendly feedback
 - Deployed on `puter.js` with key-object storage and serverless function logic
 - React Router frontend with upload, preview, and scoring features
- **URL Shortener:** Custom short link generator with analytics
 - Built with React, Supabase, Tailwind CSS, ShadCN, and deployed via Vercel
 - Tracks total clicks, location, and device type per shortened URL
- **Job Portal:** Job platform for candidates and recruiters with real-time tracking
 - Candidates: filter, save, apply for jobs, and track application status
 - Recruiters: post jobs, manage applications, and update hiring stages
 - Built with React.js, Supabase, Clerk, Tailwind CSS, and ShadCN UI

- **Event Scheduler:** Personalized scheduling platform for meetings and availability
 - Users create booking pages, manage events, and set availability
 - Real-time updates for upcoming and past meetings
 - Built with Next.js, NeonDB, Clerk, Tailwind CSS, and ShadCN

Research / Contributions

Open Source Contributor

— **GitHub + Elixir Community** 2023 – Present —
Online

- Contributed to Elixir Community's official website — fixed bugs, improved accessibility, and optimized SEO
- Worked on performance and SEO improvements using Lighthouse, PageSpeed Insights, and Chrome DevTools
