Professional Summary

Full-Stack Developer with proven experience in building **scalable web apps, microservices**. Skilled in **React, Next.js, Node.js, PostgreSQL, MongoDB**. Strong focus on **API design, database optimization, and performance-driven engineering**.

Skills

Programming: JavaScript, TypeScript, C++, Python, SQL

Frameworks/Libraries: React, Next.js, Tailwind CSS, Node.js, Express, Prisma

Databases: PostgreSQL, MongoDB, Firebase, Supabase, NeonDB, Redis

Tools & Platforms: Git, Docker, Vercel, Render, AWS, RabbitMQ, Postman, Cloudinary

Projects

AI Resume Analyzer *Browser-based ATS resume scoring tool*

- Engineered an AI-powered platform using **React** and **Node.js** to analyze and score resumes against ATS benchmarks.
- Integrated **Claude Sonnet API** to deliver job-specific keyword optimization and actionable resume feedback.
- Deployed with serverless architecture on **puter.js**, achieving **100+ daily active uploads** with minimal downtime.

Real-Time Chat Application *Scalable microservices-based chat platform*

- Architected a distributed chat system handling thousands of concurrent users with **<200ms message latency**.
- Leveraged **RabbitMQ** for message queues and **Redis** caching to optimize throughput and real-time communication.
- Implemented 1:1 and group chat, file sharing, delivery/read receipts — improving user engagement by **40%**.

Rank Tracker *SEO keyword ranking automation platform*

- Developed with **Next.js, MongoDB, Prisma ORM**, and **BrightData SERP API** to automate keyword rank monitoring.
- Reduced manual SEO tracking effort by **90%** through automated cron-based updates and alerts.
- Visualized ranking trends with interactive dashboards, enabling data-driven SEO decisions for businesses.

Job Portal *End-to-end recruitment and application tracking system*

- Designed candidate workflows (apply, track, save jobs) and recruiter tools (shortlist, manage applicants).
- Implemented secure authentication and session management using **Clerk + Supabase backend**.
- Optimized backend queries, reducing response times by **30%** and improving platform scalability.

Event Scheduler *Personalized scheduling and booking application*

- Built an event scheduling system with **Next.js, NeonDB**, and **Clerk**, deployed globally on **Vercel**.
- Automated booking workflows, enabling users to create availability pages and reduce scheduling conflicts.
- Enhanced event management efficiency, cutting manual coordination time by **50%**.

Research & Contributions

Open Source Contributor

2023 – Present | Remote

- Contributed code improvements, bug fixes, and accessibility features to community-driven **Elixir** repositories.
- Enhanced site performance by **25%** through SEO optimization, Lighthouse audits, and web performance tuning.

Education

ABESEC, Ghaziabad

2023 – 2027

B.Tech in Electronics and Communication Engineering

SVM Sambhal, Sambhal

Graduated 2022

PCM with Computer Science
